What do you do when you are stuck on a problem in class?

It is OK to ask an adult or your partner for help but neither of those solutions really help us become **independent**, confident problem solvers.

## Problem solvers in class

Do you:

- look back at the objective (Can I) and Success Criteria
- look back at the screen, flipchart or whiteboard
- look at the Working Wall
- look at and use the resources at your tables
- persevere and try again a different way!
